

MOSO[®] bamboo solida

100% bamboo

A young child with dark hair, wearing a red and white plaid shirt, light blue jeans, and blue and white sneakers, is leaning over a dark wood floor. The child is holding a hammer with both hands, positioned as if about to strike a nail. The floor has a rich, dark brown wood grain. In the background, a white baseboard is visible on the left, and some colorful toys are partially seen in the upper right corner. The overall scene is brightly lit, suggesting an indoor setting.

bamboo solida

MOSO® Bamboo Solida is **unique** for its **hardness** while at the same time being fully **ecological**, consisting of **100% bamboo** fibers. The **large** floor boards are equipped with a **click system**, facilitating **quick**, floating **installation**. Get inspired in this brochure about the versatility of this **rockhard** collection!

stem to strip

After **harvesting**, the mature **bamboo stems** are **split** in **longitudinal direction** and the outer skin is removed. The strips **naturally** have a light yellow colour (natural), but can be **steamed** for a light brown colour (caramel).

wood look

The High Density[®] version becomes a **unique woodprint** by **embossing** the surface. This is done by feeding the boards through large rolls with various imprints.

page 12-17

High Density[®]

After treating and drying, the strips are **compressed** and glued under **high pressure**, creating an elegant random line pattern (known as High Density[®]). The result is a floor that is even **harder** than the best **tropical hardwood** species.

page 8-11

wood look rough sawn

Alternatively, the High Density[®] boards are **mechanically cross sawn** for a weathered, vintage look.

specifications

	Dimensions (mm)	
Material	MOSO® High Density* (HD) bamboo	
Product		
Natural	BF-DS210	1850x137x14
Caramel	BF-DS260	1850x137x14
Quartz White	BF-DS261W-12 / Wood look	1830x135x14
Onyx Beige	BF-DS261W-13 / Wood look	1830x135x14
Granite Grey	BF-DS261W-11 / Wood look	1830x135x14
Marble White	BF-DS261C-02 / Wood look Rough sawn	1850x135x14
Topaz Brown	BF-DS261C-06 / Wood look Rough sawn	1850x135x14
Finish		
Lacquer	Treffert 85 gr/m ² , BF-DS261W-11/12/13: Treffert 100 gr/m ²	
Edges	Micro bevel 4 sides	
Properties & certification		
Hardness (Brinell kg/mm ²)	>9.5	
CO ₂ neutral	Yes	
FSC® certified	Available on request	
Guarantee	30 years	
CE marked	Yes	
Installation method		
Floating	Advised: floating (boards connected by click system)	
Fully glued	In case of fully glueing a Polyurethane glue has to be used	
Floor heating	Possible	

hard as stone beautiful as wood

CO₂ neutral

MOSO® Bamboo Solida is officially assessed to be CO₂ neutral or better over the complete lifecycle.

healthy

As a product from nature, MOSO® Bamboo Solida is anti-static and anti-allergic, and thus facilitates a healthy indoor environment.

hard & durable

With a hardness and density superior to the best hardwood floors, MOSO® Bamboo Solida is also very suitable for use in heavy duty applications.

warranted quality

MOSO® Bamboo Solida is of the highest quality and comes with a product guarantee of 30 years.

endless resource

With a growing speed of up to 1 meter per day, Moso bamboo is the fastest growing plant on earth.

high stability

Because of the composition of compressed bamboo fibers, MOSO® Bamboo Solida will shrink and swell less than solid wood species, providing a more stable floor.

vast choice

MOSO® Bamboo Solida is available in a large variety of configurations, styles and colours to cater to anyone's preferences.

easy to install

Because of the click system the MOSO® Bamboo Solida boards are very easily connected without the use of glue.

MOSO® Bamboo Solida: a sustainable choice!

To determine the eco-impact of a floor, every phase of the life cycle should be taken into account. MOSO® Bamboo Solida offers clear sustainability advantages in each phase and is even proven CO₂ neutral over the full life cycle!

growth phase

- ✓ Made from the extremely rapidly renewable giant bamboo species "Moso", renowned for its CO₂ absorbing and O₂ producing capacity.
- ✓ Abundantly available in China (approx. 7 mio ha) and always sourced from sustainably managed forests and plantations.
- ✓ The Moso bamboo plant consists of multiple stems. As a result, several stems may be harvested each year without killing the mother plant.
- ✓ **Optional:** MOSO® bamboo FSC®-certified (most important ecolabel for sustainable wood sourcing).

growth phase

production phase

- ✓ All MOSO® bamboo floors are made in production facilities that are ISO 9001 and ISO 14001 (important quality standards) certified.
- ✓ Use of low emission adhesive, complying with the strictest emissions norm: E0 (EU requisite = E1).

production phase

end of life phase

use phase

end of life phase

- ✓ As a non toxic, natural material, MOSO® Bamboo Solida offers no restrictions in the end-of-life phase.
- ✓ If maintained well, MOSO® Bamboo Solida may be reused in similar applications (upcycling). If this is not possible, MOSO Bamboo Solida may be safely used as input material for the chipboard industry (downcycling).
- ✓ If up- or downcycling is not possible, it is recommended to use the bamboo material as sustainable substitute for fossil fuels in a biomass energy plant for the production of green energy.

use phase

- ✓ Durable = Sustainable: because of the high hardness, density and stability, MOSO® Bamboo Solida lasts very long (less replacement) even in tough circumstances.
- ✓ Proven Quality: all MOSO® bamboo flooring products are CE marked and guaranteed up to 30 years.
- ✓ Healthy indoor climate: very low emissions of volatile organic compounds (VOCs). MOSO® Bamboo Solida floors have been rated A+ in France with respect to VOC emissions: the best classification possible!
- ✓ Extra credits for sustainable building eco-labels, such as BREEAM and LEED.

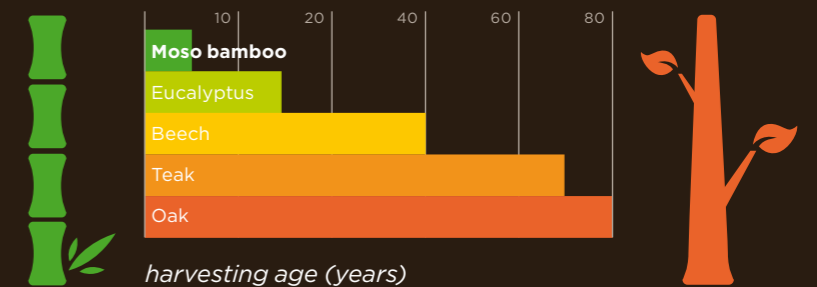

carbon footprint

MOSO® Bamboo Solida: CO₂ neutral or better over full life cycle - Life-cycle Assessment (ISO 14040/44) and carbon footprint studies executed by Delft University of Technology have confirmed that MOSO® Bamboo Solida is CO₂ neutral or better over the full life cycle. For more information about the official report please refer to our website: www.moso.eu

unsurpassed growing speed

Moso bamboo: the fastest growing plant in the world - Because of the fast growth, giant bamboo is managed as an agricultural crop: the annual harvest of the 4-5 year old stems – compared to 80 years for tropical hardwood! - provides a steady annual income to farmers and stimulates the bamboo plant to reproduce even faster. Therefore, in contrast to tropical hardwood, there is no deforestation taking place for production of MOSO® bamboo flooring.
